

State Appellate Defender Office  
Criminal Defense Resource Center

Dr. Kimberly Fenn is a Professor of Psychology at Michigan State University, where she directs the Sleep and Learning Lab. Dr. Fenn studies the impact of sleep and sleep deprivation on memory, the effect of fitness on memory, and aspects of forensic memory, such as eyewitness memory and false confessions. She is a graduate of the University of Delaware (B.A.) and the University of Chicago (M.A. and Ph.D.).

## Memory: Key Principles for Defense Attorneys

In this training, Dr. Fenn will discuss how memory is formed and how it can evolve and change. She will focus on false memory and use evidence from empirical studies to illustrate ways in which memory can be altered, after initial acquisition. Dr. Fenn will also explain how entire memories can be created for events that never actually occurred. Finally, Dr. Fenn will describe traumatic memory and how a traumatic memory differs from a more benign memory.
